

## 2007 AERA Election Results—First-Time Use of Electronic Balloting Improves Turnout

The American Educational Research Association (AERA) is pleased to announce the results of the 2007 Association Election. Congratulations to the AERA members who were elected to serve as officers of the Association. The 2007 election was an important landmark for the Association, as AERA began the migration from mailed paper ballots to electronic balloting. Of the 4,185 ballots received in 2007, 73.91% were submitted electronically. The overall participation rate among eligible voters was 19.13% in 2007, compared with 15.11% in 2006. The Association extends its sincere thanks to those voting members who exercised their privilege to elect officers of the Association and to all of the fine candidates who were willing to put their names forward to work on behalf of the Association and the advancement of education research.
