## THE CHINESE UNIVERSITY OF HONG KONG

### Dean of the Faculty of Education

The Chinese University of Hong Kong, founded in 1963, aspires to be acknowledged regionally and internationally as a first-class comprehensive research university. The University offers a broad spectrum of programmes up to PhD level in various disciplines organized under eight (8) Faculties (viz. Arts, Business Administration, Education, Engineering, Law, Medicine, Science and Social Science), with a team of over 2,000 full-time teaching and research staff. In 2007-08, undergraduate and postgraduate enrolment in publicly-funded programmes stands close to 10,700 and 3,400 respectively (<http://www.cuhk.edu.hk>).

The Faculty of Education comprises the Departments of Curriculum and Instruction, Educational Administration and Policy, Educational Psychology, Sports Science and Physical Education and the Physical Education Unit. With the aim of educating graduate teachers and professionals in education, the faculty offers a wide range of full-time and part-time programmes with 360 undergraduates, 1,350 postgraduate students (including 145 postgraduate research students) and 1,250 postgraduate diploma students, complemented by a team of 130 full-time teaching and research staff. Detailed information on the Faculty is available at <http://www.fed.cuhk.edu.hk/>.

The University seeks qualified candidates for the Deanship of the Faculty. The Dean will be a member of the University senior management team reporting to the University Council via the Vice-Chancellor/President or the Provost. As the academic and executive head of the Faculty, the Dean will provide academic leadership and discharge administrative responsibilities in respect of academic, staff, financial and student matters.

Candidates should be academics with established scholarship appropriate for appointment at professor level in an academic department, with an appreciation of the breadth of research and educational developments in the fields relevant to the Faculty. They should have demonstrated capability for academic leadership and management at an appropriate level in higher education institutions, long-term vision for the development of the Faculty, and excellent interpersonal and communication skills.

Salary and fringe benefits for the post will be highly competitive, commensurate with qualifications and experience.

Please send applications/nominations under confidential cover, with the post marked, to the Search Committee for the Dean of the Faculty of Education, c/o Office of the Vice-Chancellor/President, The Chinese University of Hong Kong, Shatin, N.T., Hong Kong [fax: (852) 2603 5230; e-mail: [SCDeanship@cuhk.edu.hk](mailto:SCDeanship@cuhk.edu.hk)]. All applications/nominations will be treated in strict confidence. The Personal Information Collection Statement will be provided upon request.

Consideration of applications/nominations will begin in April 2008 and will continue until the post is filled. The University reserves the right to fill the post by invitation.

### Fertilizers, Pills & Magnetic Strips: The Fate of Public Education in America Gene V Glass

Starting with a sweeping account of the economic and demographic forces that shaped 21st Century America, Glass paints a portrait of the tension between aging White middle-class Baby Boomers and the minority clientele of public institutions that underlies the great policy debates in public education today. The reform proposals of the last fifty years have little to do with quality and much to do with cost and privilege.

"Never have I seen a clearer or more sensible exploration of our testing frenzy. I thought one chapter, 'What Influences Test Scores, or How Not to Pick a School,' was all by itself worth the price of the book. Read it and relax."

## Measuring Up

What Educational Testing Really Tells Us

DANIEL KORETZ

Inspired by a popular Harvard course for students without an extensive mathematics background, *Measuring Up* demystifies educational testing—from MCAS to SAT to WAIS, with all the alphabet soup in between. Bringing statistical terms down to earth, Daniel Koretz takes readers through the most fundamental issues that arise in educational testing and shows how they apply to some of the most controversial issues in education today, from high-stakes testing to special education.
