

## President-Elect Carol D. Lee Invites Nominations for Committees

### *Committee Appointment Process About to Commence*

Dear AERA Colleagues:

AERA represents a broad community of research interests. It gains in strength from the many opportunities for participation and leadership across the organization. We come from different disciplines and institutions. However, we share a joint interest in the pursuit of knowledge to enhance educational opportunities for all and to expand fundamental knowledge about human learning and development.

In the coming months, I will be making appointments to AERA standing and award committees. I seek your support in securing nominations for committee service. You may nominate yourself or others. Appointments will be made to the following committees:

- Annual Meeting Policies and Procedures
- Communications and Outreach
- Government Relations
- International Relations
- Minority Fellowship Selection
- Nominating
- Professional Development and Training
- Publications
- Research Advisory
- Scholars and Advocates for Gender Equity in Education
- Scholars of Color in Education
- Social Justice Action
- Technology

In addition, appointments will be made to the following awards committees:

- Distinguished Contributions to Research in Education
- Early Career
- E. F. Lindquist
- Outstanding Book
- Palmer O. Johnson Memorial
- Relating Research to Practice
- Review of Research

Please send a biographical statement (one page maximum) describing the nominee and include which committees are of interest and why. In addition, please contact me if you have recommendations regarding how as an organization we can support education research, including expanding capacity in the field and expanding opportunities within the AERA itself. Please send materials electronically to me at [presidents@era.net](mailto:presidents@era.net). I can also be reached at the School of Education and Social Policy, Northwestern University, 2120 Campus Drive, Evanston, IL 60208.

Thank you,  
Carol D. Lee, President-Elect
