Dear Chairman Shelby, Vice Chairman Leahy, Chair Lowey, and Ranking Member Granger,

We write on behalf of the Friends of IES, a coalition of organizations committed to supporting the essential role of the Institute of Education Sciences (IES), to highlight the continued need to invest in the important education research, statistical programs, and evidence-based resources that IES supports as part of fiscal year (FY) 2020 appropriations.

As you work to finalize FY2020 appropriations, we urge you, as part of any year end appropriations agreement, to increase funding for IES to $650 million. This level of funding was included in the House Labor, Health and Human Services, and Education appropriations bill for IES and will strengthen the agency’s ability to support emerging lines of inquiry and tackle pressing questions about education, such as what can be done to increase school safety, address challenges facing rural districts, support improved teacher professional development, and bolster the impact of technology in the classroom.

Without this increase, or under a level-funded continuing resolution (CR), we are concerned about the impact of limited funding on core statistical surveys that inform our knowledge on the condition of education; research in all areas, including special education; the National Assessment of Educational Progress; and dissemination of evidence-based practices to teachers, school leaders, and policymakers. A robust investment in IES will provide the resources needed to produce data and research to inform policy decisions and support teaching and learning.

Thank you for considering this request. We look forward to continue working with you to ensure that IES has the necessary funding in FY 2020 to support research, statistics, evaluation, and technical assistance to improve educational outcomes.
Sincerely,
